**CODE OF ETHICS**

We accept the responsibility of cultivating by precept and example in our communities, the enlightened use of solid fuel appliances, and of developing in our clients as the general public a respect for safety in the installation, operation and maintenance of all solid fuel burning units.

We encourage our members to accept the role of well-informed and articulate professionals, and to admit openly when we are unsure of the proper course to follow.

We criticize those who would disparage a competitive product or service, in order to enhance their own products or service through unfair comparison.

We endeavor to develop a respect for precision and accuracy in the performance of our duties, and to ensure to the best of our knowledge and ability that all we have claimed has been done.

We endorse the use of liability insurance to assure protection for our clients, ourselves and our businesses.

We dedicate ourselves fully to these principles, confident in the belief that professionalism and honesty will ultimately prevail in the free marketplace.

I, and all who I employ, agree to abide by the NYSCSG, Ltd's Code of Ethics during the term of my membership. I understand that failure to abide by these ethical obligations is a violation of NY Guild Policy and is subject to disciplinary action by the Board of Directors as outlined in our current by-laws. The NYSCSG, Ltd. Will be held harmless for any action taken against me for disciplinary action.
