

OIL BURNER EFFICIENCY WORKSHOP

Saturday October 5, 2013

Taught by Peter Cullen of WohlerUSA

Peter will teach the basics of combustion theory and combustion analysis for both oil and gas burners. He will discuss how to use the latest in diagnostic theory...what a reading means...learn how to warn and inform customers of dangers...the basics of carbon monoxide and measuring it in venting systems and living areas.

****Special discounts on the purchase of equipment will be available only for this day only****

Awarded CEUs: NFI: 1.0

CSIA: Technical 0.75 Codes and Standards 0.25

Class time is 1 hour, with space available for 15 to 20 attendees. First class is from 9-10 AM. If the number of people for this session exceeds the maximum allowed, a second class will be held from 10-11 AM. And again, if the number of people exceed the space allowed at the second session, a third class will be held from 11 AM-12 noon.
